

Positioners suitable for use with modulating damper actuators

• For front-panel mounting

## **Technical data**

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 19.228.8 V
	Power consumption in operation	0.3 W
	Power consumption for wire sizing	1 VA
	Output power note	for max. 10 actuators
	Connection supply / control	Terminals 1.5 mm <sup>2</sup>
Functional data	Operating range Y	210 V
	Operating range Y note	Operating range selectable 010 V or 210 V
	Scale	0100% (angle of rotation can be limited mechanically with rotary knob)
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Degree of protection IEC/EN	IP40
		IP protection in consideration of the
		installation specification
	EMC	CE according to 2014/30/EU
	Type of action	Type 1
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	-2050°C [-4122°F]
	Storage temperature	-4080°C [-40176°F]
	Servicing	maintenance-free
Weight	Weight	0.034 kg

## Safety notes

<u>/</u>!\

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

. . . .

Product features			
Operating mode	The positioner is supplied with operating voltage via terminals 1 and 2. Proportional. Proportionate to the position of the rotary knob, a control signal Y is generated, which is either 210 V or 010 V, or a position change occurs at the actuator within the range of 0100% (minmax). The angle of rotation of the adjustment knob can be subjected to mechanical limitation.		
Application	The positioner is used for the (remote) control of modulating damper actuators or as a minimum positioner (lower limitation of output signals from modulating controllers). The adjustment range is 0100% angle of rotation of the connected actuator.		
Simple changeover	The switching from 210 V to 0.510 V is accomplished by means of a slide switch on the printed circuit board.		
Electrical installation			
<u> </u>	Supply from isolating transformer.
